

Low Voltage Adjustable Precision Shunt Regulator

Features

- Precise Reference Voltage to 1.24V
- Guaranteed 0.5% or 1% Reference Voltage Tolerance
- Sink Current Capability , 60mA to 100mA
- Quick Turn-on
- Adjustable Output Voltage , $V_O = V_{REF}$ to 20V
- Low Operational Cathode Current , 60mA Typical
- 0.1 Ω Typical Output Impedance
- SOT-23-5 Packages

Applications

- Linear Regulators
- Adjustable Power Supply
- Switching Power Supply

General Description

The APL1431L is a 3-terminal low voltage adjustable precision reference with specified thermal stability over applicable commercial temperature ranges . Output voltage may be set to any value between V_{REF} (1.24 V) and 20 V with two external resistors (see Figure 2) . When used with an photocoupler , the APL1431L is an ideal voltage reference in isolated feedback circuits for 1.24V to 12V switching-mode power supplies . This device has a typical output impedance of 0.1 Ω . Active output circuitry provides a very sharp turn-on characteristic , making the APL1431L excellent replacements for zener diodes in many applications , including on-board regulation and adjustable power supplies .

Notes for Application Circuits:

1) To improve the stability of output voltage , a 0.1µF capacitor between cathode and anode of APL431L is strongly recommended.

2) Set V_O according to the following equation:

$$V_O = V_{REF} (1 + R_1 / R_2) + I_{REF} R_1$$

3) Choose the value for R_B as follows:

- The maximum limit for R_B should be such that the cathode current (I_K) is greater than the minimum operating current (60µA) at $V_{IN(MIN)}$.
- The minimum limit for R_B should be such that the cathode current (I_K) does not exceed 100mA under all load conditions, and the instantaneous turn-on value for I_K does not exceed 150mA . Both of the following conditions must be met :

$$R_{B,MIN} \geq V_{IN(MAX)} / 150mA \text{ (to limit instantaneous turn-on } I_K)$$

$$R_{B,MIN} \geq V_{IN(MAX)} - V_O / I_{O(MIN)} + 100mA \text{ (to limit } I_K \text{ under normal operating conditions)}$$
